

IN THE CLAIMS:

kindly cancel Claims 6. Claims 1-5 and 8-9 were  
previously cancelled. Please amend Claims 7 and 10-23.

A complete list of Claims and their status is as follows:

*Sub E1*

~~1. (canceled) A wireless telecommunications unit a foldable electronic display displaying images to a user, comprising:~~

~~a centrally disposed display;~~

~~at least one connected electronic sub-display unit;~~

~~a user-deployable support supporting said at least one sub-display unit maintaining said at least one sub-display unit in an upwardly projecting disposition during use;~~

*D/mt*

~~said at least one sub-display unit having user-variable electronic display controllers for displaying images; and~~

~~said wireless telecommunications unit further having a bottom base surface and at least one upper display surface angled obliquely to a user's line of sight during use.~~

~~2. (canceled) The wireless telecommunications unit as in claim 1, wherein said wireless telecommunications unit comprises:~~

~~a hollow housing;~~

~~said hollow housing has a user attachable and detachable connector connecting said housing to said at least one sub-display unit.~~

3. (canceled) The wireless telecommunications unit as in Claim 2, further comprising:

said centrally disposed display is obliquely angled to a view of said user;

said hollow housing comprises a keyboard in communication with said unit, and wherein said display comprises at least one of said plurality of displays; and,

said at least one sub-display unit is obliquely angled to a view of said user;

4. (canceled) A hand-held wireless telecommunications unit displaying images to a user, comprising:

a hand-held body having a keypad ; and

a display comprising visual and, auditory displays; and wherein

said display comprises at least one central display screen and at least one additional screen disposed from said central screen; and wherein

said auditory display comprises sound-producing means.

5. (canceled) The wireless communications unit of Claim 4 wherein

said at least one additional screen is attached hingedly to said body of said hand-held game; and wherein said hingedly attached at least one additional screen folds between an outward deployed position and an inward storage position.

6. (cancelled) A hand-held wireless telecommunications unit displaying images to a user, comprising:

a hand-held body having a keypad;

a display displaying at least one visually perceptible display and at least one auditory display, wherein:

said visually perceptible display comprises at least one central display screen and at least one additional screen disposed from said central screen;

wherein said at least one additional screen is guided and deployed in a co-planar position relative to said central screen of said hand-held body of said wireless telecommunications unit; and wherein said at least one additional screen is guided between an outward deployed position and an inward storage position; and,

wherein said at least one additional screen is attached slidably within said body of said unit.

7. (amended) ~~The hand-held wireless communications unit~~  
~~of claim 6~~ A hand-held wireless telecommunications unit  
displaying images to a user, comprising:

a hand-held body having a keypad;

a display displaying at least one visually perceptible  
display and at least one auditory display, wherein:

said visually perceptible display comprises at least  
one central display screen and at least one additional  
screen disposed from said central screen;

wherein said at least one additional screen is guided  
and deployed in a co-planar position relative to said  
central screen of said hand-held body of said wireless  
telecommunications unit; and wherein said at least one  
additional screen is guided between an outward deployed  
position and an inward storage position;

wherein said at least one additional screen is attached  
slidably within said body of said unit; and,

wherein said slidable at least one additional screen is  
spring deployable, and wherein said slidably attached at  
least one additional screen slides with urging from said  
spring between an outward deployed position and an inward  
storage position.

8. (canceled) A multiple screen cellular telephone  
comprising:

a cell phone handset housing equipped with a

plurality of LCD panels deployable in an ergonomic manner with one hand of a user;

a first panel of said plurality of LCD panels being fixed relative to said housing, and at least one other panel of plurality said panels movable into an observable position with said first panel; and

said at least one other panel of said cell phone handset movably guided into said observable position with said first panel.

9. (canceled) A hand-held computerized accessory and cellular telephone comprising:

a hand-held body having an input interface for a user;

a telecommunications and computer multimedia display comprising visual, and auditory displays, wherein

said telecommunications and computer multimedia display having at least one central display screen and at least one additional screen respectively disposed from said central screen.

10. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said telecommunications unit is a cellular telephone.

11. (previously added and amended) The hand held wireless telecommunications unit of Claim 6 7

wherein said telecommunications unit is a wireless personal digital assistant.

12. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said telecommunications unit is wireless Internet Web based personal electronic organizer.

13. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said visually perceptible display is at least one liquid crystal display screen.

14. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said auditory display includes at least one sound producing means.

15. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said at least one additional slidably attachable screen is a plurality of screens.

16. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said at least one slidably attached screen comprises at least one

screen slidably attached to the left side of said at least one central display.

17. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said at least one slidably attached screen comprises at least one screen slidably attached to the right side of said at least one central display.

18. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7

wherein said at least one slidably attached screen comprises at least one screen slidably attached to the left of said central display and at least one screen slidably attached to the right of said central display.

19. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7 wherein said at least one additional screen is co-planar with said at least one central display.

20. (previously added and amended) The hand-held wireless telecommunications unit of Claim 6 7

wherein said at least one central display screen is powered by a first driver electronics circuitry controlled by imaging software and said at least one additional screen

is powered by a separate driver electronics circuitry controlled by imaging software.

21. (previously added and amended) The hand-held wireless telecommunications unit of Claim ~~6~~ 7 wherein said central display and said at least one additional screen are both powered by a common driver electronics circuitry controlled by imaging software.

*DI  
amended*

22. (previously added and amended) The hand-held wireless telecommunications unit of Claim ~~20~~ 7 wherein said at least one central display displays a first image on a screen powered by said first driver electronics circuitry controlled by imaging software and said at least one additional screen displays a second image on said additional screen powered by said second driver electronics circuitry controlled by imaging software.

23. (previously added and amended) The hand-held wireless telecommunication unit of Claim ~~6~~ 7 wherein said at least on central display and said at least one additional screen display respective portions of a single image.--
